To Whom It May Concern:

Re: see attached list of students

This is to confirm that the above named learners are full time students at this school, currently studying in year 11, and that they have the legal right to be educated in the UK.

The learners at our college come from different boroughs where they are considered at risk of not being in education, employment or training (NEET).

We felt that the above named students could greatly benefit from taking part in this Creative Arts Project with Akademi South Asian dance to encourage them to remain in learning and progress to further learning, training or employment.

The programme with Akademi proposes extra curricular activities to improve confidence and life skills as well as an additional award, the 'Arts Award' and some work based learning. The programme aims to encourage the learners and help to secure the progression of their learning journey.

We believe the project would benefit the above named students and secure them in their learning at the school and reduce the risk of NEET.

Yours faithfully,

Annette McLachlan
Head of PE
